## Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Arthropoda	Insecta	Lepidoptera	Pieridae

**Taxon Name:** *Euchloe grancanariensis* Acosta, 2008

**Taxonomic Notes:**

*Euchloe grancanariensis* was formerly considered a subspecies of the Green-striped White (*E. belemia*).

## Assessment Information

**Red List Category & Criteria:** Least Concern [ver 3.1](#)

**Year Published:** 2010

**Date Assessed:** January 29, 2009

**Justification:**

This species is listed as Least Concern, since it has not been declining by more than 25% in the last ten years and its population size is probably larger than 10,000 adult individuals.

## Geographic Range

**Range Description:**

Restricted to the Canary Island of Gran Canaria. This is a European endemic species.

**Country Occurrence:**

**Native:** Spain (Canary Is.)

# Distribution Map

## *Euchloe grancanariensis*

Range

■ Extant (resident)

Compiled by:  
Butterfly Conservation Europe  
2009

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

## Population

A local species, restricted to (semi-) natural areas.

**Current Population Trend:** Stable

## Habitat and Ecology (see Appendix for additional information)

This species occurs on dry open grassland with some bushes of *Euphorbia* species. Detailed habitat descriptions are not available.

**Systems:** Terrestrial

## Use and Trade

All butterflies are collected to some extent, but only for the extremely rare species it can be a problem and the trade in Europe is generally at a low level compared to other continents. There is no specific trade information for this species.

## Threats

Although this is a European endemic with a restricted range, this species is not believed to face major threats at the European level.

## Conservation Actions

More research on the ecological requirements is needed. As far as is known now, no specific conservation actions are needed at a European level, but since it has a restricted global range, its distribution and trend should be monitored closely, for example by a Butterfly Monitoring Scheme.
