Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Arthropoda	Insecta	Hymenoptera	Colletidae

Taxon Name: *Hylaeus ater* (Saunders, 1903)

Taxonomic Source(s):

Dathe, H.H. 1993. Taxonomie und Verbreitung der Gattung *Hylaeus* F. auf den Kanarischen Inseln. *Veröffentlichungen des Übersee-Museums Bremen (Naturwissenschaften)* 12(2): 743-760.

Taxonomic Notes:

The species was formerly mixed with *H. canariensis* and *H. hohmanni* (Dathe 1993).

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2013

Date Assessed: September 6, 2013

Justification:

Listed as Least Concern because, although it has a restricted distribution, it is nearly present in all the islands of the Canary Island archipelago and the species is relatively common and abundant. However there is no information regarding the habitat, ecological requirements and threats to this species, so further research is needed.

Geographic Range

Range Description:

This species is endemic to the Canary Islands, and is present in nearly all the islands of the Canary Island archipelago (Dathe 1993).

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Hylaeus ater

Range

■ Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

A relatively frequent and common species, found in many collections. Populations are not small, but there is no information available on the population trend of this species.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

The details about the habitats, the bionomics and ecological requirements of this species are not known.

Systems: Terrestrial

Use and Trade

This species is not traded or exploited commercially.

Threats

The threats to this species are not known.

Conservation Actions (see Appendix for additional information)

This species is not included in the Spanish Red Data Book. The species is not subject to any targeted conservation action. It is not known if the species occurs in protected areas but it is likely that it occurs. Further research is required to establish the habitat and ecological requirements and to identify the existing threats.
