Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Hygromiidae

Taxon Name: *Canariella gomerae* (Wollaston, 1878)

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2013

Date Assessed: March 24, 2011

Justification:

This species is widespread on the island. The population size can be estimated as low to very low. Most of the subpoulations live in protected areas, and there are no threats to this species known. Therefore it is assessed as Least concern (LC).

Geographic Range

Range Description:

This species is endemic to the island of La Gomera. It inhabits the central and northern part of the island. This species is recorded from 12 locations and 17 sites.

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Canariella gomerae

Range

Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There are no data on the population size or trend. However, there are only a few living animals were recorded in the course of the last 20 years, although the island was visited by several malacologists. The population size can be estimated as low to very low.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species lives in the dry temperate shrub vegetation (Piso basal), Laurel forests (Laurisilva), lowland vegetation and Fayal-Brezal.

Systems: Terrestrial

Use and Trade

This species is not used.

Threats

There are no threats to this species known.

Conservation Actions (see Appendix for additional information)

Major parts of the subpopulations are under local conservation schemes.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
1. Forest -> 1.4. Forest - Temperate	-	Suitable	Yes
3. Shrubland -> 3.4. Shrubland - Temperate	-	Suitable	Yes

Conservation Actions in Place

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Conservation Actions in Place
In-Place Land/Water Protection and Management
Occur in at least one PA: Yes

Additional Data Fields

Distribution
Estimated extent of occurrence (EOO) (km ²): 170
Number of Locations: 12
Lower elevation limit (m): 100
Upper elevation limit (m): 1200
Population
Population severely fragmented: No
