Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Hygromiidae

Taxon Name: *Canariella multigranosa* (Mousson, 1872)

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2013

Date Assessed: September 30, 2010

Justification:

The species is widespread on Gomera and is not considered as threatened. It is listed as Least Concern (LC).

Geographic Range

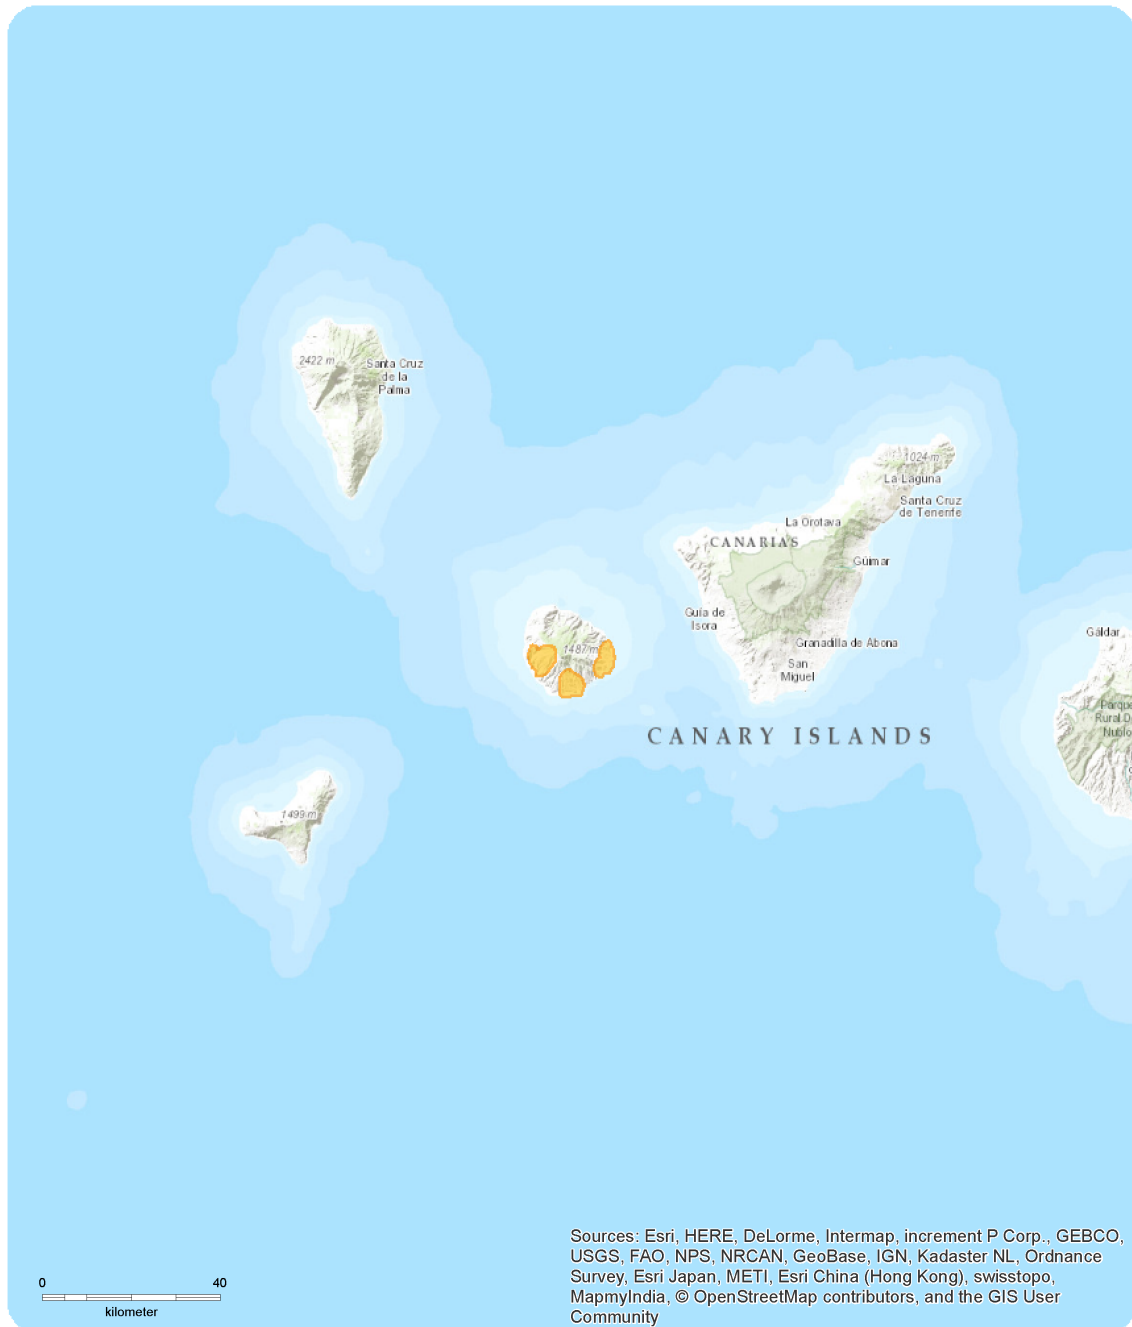

Range Description:

The species is widespread on La Gomera. This species is recorded from 11 locations and 14 sites.

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Canariella multigranosa

Range
■ Extant (resident)

LEAST CONCERN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There are no data on the population size or trend. However, the population is probably stable or only slightly decreasing due to threats in the coastal areas in the south of Gomera.

Current Population Trend: Stable

Habitat and Ecology (see Appendix for additional information)

This species lives in the dry temperate shrub vegetation (Piso basal), hidden under rocks or burrowed in the soil.

Systems: Terrestrial

Use and Trade

This species is not used.

Threats

There are no major threats.

Conservation Actions

There are no conservation measures.
