## Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Helicidae

**Taxon Name:** *Hemicycla fritschi* (Mousson, 1872)

## Assessment Information

**Red List Category & Criteria:** Data Deficient [ver 3.1](#)

**Year Published:** 2013

**Date Assessed:** March 24, 2011

### Justification:

The distribution of this species is not clear, and there is no information on population size and trends or threats. Consequently this species is assessed as Data Deficient (DD).

## Geographic Range

### Range Description:

This species is endemic to La Gomera where it was recorded by Fritsch, Wollaston and Lowe in the middle of the 19th century on the slopes above San Sebastian. It was not subsequently found or mentioned by Ibanez and his colleagues (K. Groh, pers. comm., 2011). It was only found by K. Groh near to San Sebastian, in the eastern part of the island. Only Rachl (in Bank *et al.* 2002) mentions specimens from the north-west of the island, from between Tazo and Arguamul.

### Country Occurrence:

**Native:** Spain (Canary Is.)

# Distribution Map

Range

■ Extant (resident)

Compiled by:  
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

## Population

There is no information available.

**Current Population Trend:** Unknown

## Habitat and Ecology (see Appendix for additional information)

This species lives in the dry temperate shrub vegetation (Piso basal).

**Systems:** Terrestrial

## Use and Trade

The species is used.

## Threats

There is no information available regarding threats.

## Conservation Actions

There is no information available on conservation actions.
