Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Helicidae

Taxon Name: *Hemicycla fulgida* Alonso & Ibanez, 2007

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2013

Date Assessed: March 24, 2011

Justification:

Although this species has a relatively restricted range, its population trend is stable and there are no known major threats. Consequently it is assessed as Least Concern.

Geographic Range

Range Description:

This species was described in 2007 (Alonso & Ibanez 2007). It is endemic to the north-east of Tenerife, where it is found at altitudes of 650-980 m in the Anaga mountains. It is known from 15 sites and five locations. Its AOO is estimated at 50 km² and EOO at 20 km².

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Hemicycla fulgida

Range

■ Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

The population trend is stable.

Current Population Trend: Stable

Habitat and Ecology (see Appendix for additional information)

It is found in temperate forest (Laurisilva).

Systems: Terrestrial

Use and Trade

This species is not used.

Threats

There are no known threats to this species.

Conservation Actions (see Appendix for additional information)

The entire distribution of the species is within a protected area.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
1. Forest -> 1.4. Forest - Temperate	-	Suitable	Yes

Conservation Actions in Place

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Conservation Actions in Place
In-Place Land/Water Protection and Management
Occur in at least one PA: Yes
Percentage of population protected by PAs (0-100): 100

Additional Data Fields

Distribution
Estimated area of occupancy (AOO) (km ²): 20
Estimated extent of occurrence (EOO) (km ²): 50
Number of Locations: 5
Lower elevation limit (m): 650
Upper elevation limit (m): 980
