## Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Helicidae

**Taxon Name:** *Hemicycla gaudryi* (D'Orbigny, 1839)

## Assessment Information

**Red List Category & Criteria:** Data Deficient [ver 3.1](#)

**Year Published:** 2013

**Date Assessed:** March 24, 2011

### Justification:

There is insufficient information on distribution, population size and trend and threats to assess this species. There are no published records since 1932. Consequently the species is assessed as Data Deficient (DD).

## Geographic Range

### Range Description:

This species is endemic to Gran Canaria. It was described in 1839 and later given several synonyms by Mabilie in 1882 and 1883. The last published reference is by Odhner (1932), who describes it to be not rare in the middle heights of Gran Canaria. The species was not refound or mentioned by Ibanez and his colleagues, nor found by K. Groh (K. Groh, pers. comm., 2011). Fresh shells are offered by shell dealers such as Femorale in Brazil and Shell Auction in Italy, so apparently living populations of this species still exist, but no data are available.

### Country Occurrence:

**Native:** Spain (Canary Is.)

# Distribution Map

## *Hemicycla gaudryi*

Range

■ Extant (resident)

Compiled by:  
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

## Population

No data are available.

**Current Population Trend:** Unknown

## Habitat and Ecology (see Appendix for additional information)

No data are available.

**Systems:** Terrestrial

## Use and Trade

No data are available.

## Threats

No data are available.

## Conservation Actions

No data are available.

## Credits

**Assessor(s):** Groh, K.
