Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Helicidae

Taxon Name: *Hemicycla glasiana* (Shuttleworth, 1852)

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2013

Date Assessed: March 24, 2011

Justification:

A widespread and common species that is not facing any major threats; it is assessed as Least Concern.

Geographic Range

Range Description:

This species is endemic to Gran Canaria where it is widespread and common in a range of different habitats and altitudes. It is found at several locations with many sites. AOO is estimated to be greater than 300 km².

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Hemicycla glasiana

Range

■ Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

A common species, population trend is believed to be stable.

Current Population Trend: Stable

Habitat and Ecology (see Appendix for additional information)

It is found in a range of different habitats from Piso basal to the local pine forests (Pinar).

Systems: Terrestrial

Use and Trade

This species is not used.

Threats

Although there may be some localised impacts in cultivated and inhabited areas, these are not considered to be threats to the species.

Conservation Actions

There is no information on conservation actions.
