## Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Helicidae

**Taxon Name:** *Hemicycla gomerensis* (Morelet, 1864)

## Assessment Information

**Red List Category & Criteria:** Data Deficient [ver 3.1](#)

**Year Published:** 2013

**Date Assessed:** March 26, 2011

### Justification:

There is insufficient information on distribution, population size and trend and threats to be able to assess this species in any category other than Data Deficient (DD).

### Previously Published Red List Assessments

2013 – Data Deficient (DD)

## Geographic Range

### Range Description:

This species is endemic to La Gomera, although there are no precise data regarding localities where it has been found. It was found by Paiva in the mid 1850s and described in 1864; it is only mentioned later by Mousson in 1872 and Wollaston in 1878. This species was not re-found or mentioned by Ibanez and his colleagues, nor found by K. Groh (K. Groh pers. comm. 2011).

### Country Occurrence:

**Native:** Spain (Canary Is.)

# Distribution Map

## *Hemicycla gomerensis*

Range

■ Extant (resident)

Compiled by:  
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

## Population

There is no information available.

**Current Population Trend:** Unknown

## Habitat and Ecology (see Appendix for additional information)

There is no information available.

**Systems:** Terrestrial

## Use and Trade

This species is not used.

## Threats

There is no information available.

## Conservation Actions

There is no information available. Research is recommended to attempt to re-discover the species.
