Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Cochlicellidae

Taxon Name: *Monilearia caementitia* (Shuttleworth, 1852)

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2013

Date Assessed: March 24, 2011

Justification:

This species is known from a considerably large range in Gran Canaria (in terms of island species). Its range is under various protection schemes and it does not face any threat. It is therefore considered Least Concern (LC).

Geographic Range

Range Description:

This species is endemic to the west coast of Gran Canaria and lives in an area of ca. 100 km².

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Monilearia caementitia

Range

■ Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There is no information available on the population size of this species.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species lives in the dry temperate shrub vegetation (Piso basal).

Systems: Terrestrial

Use and Trade

This species is not used.

Threats

There are no threats known to this species.

Conservation Actions (see Appendix for additional information)

More than half of the distribution area of this species is situated within the Reserva Natural Especial de Güigü, Parque Natural de Tamadaba, and the Parco rural del Nublo. Thus no particular conservation actions are needed.
