Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Cochlicellidae

Taxon Name: *Monilearia montigena* Bank, Groh & Ripken, 2002

Taxonomic Notes:

This is a substitute name for *Helix lemniscata* Webb & Berthelot, 1833 (see Bank *et al.* 2002).

Assessment Information

Red List Category & Criteria: Near Threatened [ver 3.1](#)

Year Published: 2013

Date Assessed: March 24, 2011

Justification:

This species has a restricted extent of occurrence of 150 km². Parts of the distribution area, particularly the lowlands, are under threat because of increasing spread of urbanisation of the city of Las Palmas de Gran Canaria. These activities are increasing, and may drive considerable parts of subpopulations of this species into problems. For this reason, this species is here listed as Near Threatened, almost meeting the criteria B, but further monitoring is recommended, which may lead to a higher threat category.

Geographic Range

Range Description:

This species is widespread in the northeast of Gran Canaria (El Monte district).

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Monilearia montigena

Range

■ Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There are no data on the population size or trend.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species lives in the dry temperate shrub vegetation (Piso basal and Piso infracanario).

Systems: Terrestrial

Use and Trade

This species is not used.

Threats (see Appendix for additional information)

Parts of the distribution area, particularly the lowlands, are under threat because of increasing spread of urbanisation of the city of Las Palmas de Gran Canaria.

Conservation Actions (see Appendix for additional information)

Small parts of the distribution area are under protection (Paisaje protegido de Pino Santo and Roque Nublo).

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
3. Shrubland -> 3.4. Shrubland - Temperate	-	Suitable	Yes

Threats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Threat	Timing	Scope	Severity	Impact Score
1. Residential & commercial development -> 1.1. Housing & urban areas	Ongoing	-	-	-
	Stresses:	1. Ecosystem stresses -> 1.1. Ecosystem conversion 1. Ecosystem stresses -> 1.2. Ecosystem degradation 2. Species Stresses -> 2.1. Species mortality		

Conservation Actions in Place

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Conservation Actions in Place
In-Place Land/Water Protection and Management
Occur in at least one PA: Yes

Additional Data Fields

Distribution
Estimated extent of occurrence (EOO) (km ²): 150
Population
Population severely fragmented: No
Habitats and Ecology
Continuing decline in area, extent and/or quality of habitat: No
