Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Enidae

Taxon Name: *Napaeus chrysaloides* (Wollaston, 1878)

Assessment Information

Red List Category & Criteria: Data Deficient [ver 3.1](#)

Year Published: 2013

Date Assessed: March 28, 2011

Justification:

There is not enough information to assess the conservation status of this species. Further research is need on the population size, distribution area etc. It is therefore listed as Data Deficient (DD).

Geographic Range

Range Description:

Endemic to Europe: This species is endemic to the island of Gran Canaria. It is known from a small area of distribution in the centre of the island at Pineto de Tarajana above St. Bartholome. This is the type locality, there are no published records of any additional sites for this species.

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Napaeus chrysaloides

Range

■ Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There are no data on the population size or trend.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species lives in the local pine forests (Pinar).

Systems: Terrestrial

Use and Trade

This species is not used.

Threats

There are no threats to this species known because of a general lack of information.

Conservation Actions

There is no conservation action in place for this species. More research on population trends and on distribution range is needed.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
1. Forest -> 1.4. Forest - Temperate	-	Suitable	Yes

Research Needed

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Research Needed
1. Research -> 1.2. Population size, distribution & trends
1. Research -> 1.5. Threats

Additional Data Fields

Distribution
Estimated area of occupancy (AOO) (km ²): 4
Number of Locations: 1
Population
Population severely fragmented: No
