Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Enidae

Taxon Name: *Napaeus inflatiusculus* (Wollaston, 1878)

Assessment Information

Red List Category & Criteria: Data Deficient [ver 3.1](#)

Year Published: 2013

Date Assessed: March 28, 2011

Justification:

There is not enough information to assess the conservation status of this species. Further research is need on to clarify the exact provenance of this species, the population size, distribution area etc. It is therefore listed as Data Deficient (DD).

Geographic Range

Range Description:

This species is endemic to the island of La Gomera. It was described from a single specimen from the mountains above San Sebastian. This species has not been found again since its description.

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

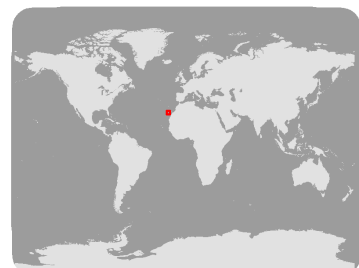

Napaeus inflatusculus

Range

■ Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There is no information available for this species.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

There is no information available for this species.

Systems: Terrestrial

Use and Trade

There is no information available for this species, however it is considered very unlikely that the species is utilized.

Threats

There is no information available for this species.

Conservation Actions

There is no information available for this species.
