Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Hygromiidae

Taxon Name: *Xerotricha pavida* (Mousson, 1872)

Assessment Information

Red List Category & Criteria: Endangered B1ab(iii)+2ab(iii) [ver 3.1](#)

Year Published: 2013

Date Assessed: March 25, 2011

Justification:

This species is endemic to the island of La Palma and inhabits the southern and eastern part of the island. This species is recorded from two locations and two isolated sites. Each site is less than 1 km², and is threatened by wild-fires. This species is therefore assessed as Endangered (EN) under B1ab(iii)+2ab(iii).

Geographic Range

Range Description:

This species is endemic to the island of La Palma and inhabits the southern and eastern part of the island. This species is recorded from two locations and two isolated sites. Each site is less than 1 km².

Country Occurrence:

Native: Spain (Canary Is.)

Distribution Map

Xerotricha pavidus

Range

Extant (resident)

Compiled by:
IUCN

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

There are no data on the population size or trend.

Current Population Trend: Unknown

Habitat and Ecology (see Appendix for additional information)

This species lives in the humid parts of the local pine forests (Pinar).

Systems: Terrestrial

Use and Trade

This species is not used.

Threats (see Appendix for additional information)

The main threat for this species are wild fires in the pine forests.

Conservation Actions (see Appendix for additional information)

The complete distribution area of this species is under local conservation schemes.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
1. Forest -> 1.4. Forest - Temperate	-	Suitable	Yes

Threats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Threat	Timing	Scope	Severity	Impact Score
7. Natural system modifications -> 7.1. Fire & fire suppression -> 7.1.1. Increase in fire frequency/intensity	Ongoing	-	-	-
	Stresses:	1. Ecosystem stresses -> 1.1. Ecosystem conversion 1. Ecosystem stresses -> 1.2. Ecosystem degradation 2. Species Stresses -> 2.1. Species mortality		

Conservation Actions in Place

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Conservation Actions in Place
In-Place Land/Water Protection and Management
Occur in at least one PA: Yes

Additional Data Fields

Distribution
Estimated area of occupancy (AOO) (km ²): 4
Estimated extent of occurrence (EOO) (km ²): 80
Number of Locations: 2
Lower elevation limit (m): 270
Upper elevation limit (m): 1500
Population
Population severely fragmented: No
Habitats and Ecology
Continuing decline in area, extent and/or quality of habitat: Yes

The IUCN Red List Partnership
