Taxonomy

Kingdom	Phylum	Class	Order	Family
Animalia	Mollusca	Gastropoda	Stylommatophora	Oxychilidae

Taxon Name: *Oxychilus brincki* Riedel, 1964

Taxonomic Source(s):

Bank, R.A. 2017. Fauna Europaea Project: Checklist of the land and freshwater Gastropoda of Europe. Last update: February 18th, 2017. Fauna Europaea Project: http://www.nmbe.ch/sites/default/files/uploads/PDF_Upload/fauna_europaea_2017_03_16.pdf. Hoogezand.

Assessment Information

Red List Category & Criteria: Least Concern [ver 3.1](#)

Year Published: 2017

Date Assessed: November 28, 2016

Justification:

This species is endemic to the Azores Islands (Portugal), where it is found on Santa Maria (Cameron *et al.* 2012) in 12 of the 17 sites recorded in the survey. It is considered to be widespread on the island and is tolerant of disturbance, and hence is considered Least Concern (LC).

Geographic Range

Range Description:

This species is endemic to the Azores Islands, where it is found on Santa Maria (Cameron *et al.* 2012, Ferreira *et al.* 2012) in 12 of the 17 sites recorded in the survey. It is considered to be widespread on the island.

Country Occurrence:

Native: Portugal (Azores)

Distribution Map

Oxychilus brincki

Range

■ Extant (resident)

Compiled by:

IUCN (International Union for Conservation of Nature)

The boundaries and names shown and the designations used on this map do not imply any official endorsement, acceptance or opinion by IUCN.

Population

This species is found on Santa Maria (Cameron *et al.* 2012) in 12 of the 17 sites recorded in the survey. It is considered to be widespread on the island and abundant at recording sites.

Current Population Trend: Stable

Habitat and Ecology (see Appendix for additional information)

The species is found in all types of forest habitats, including disturbed habitats. It is not found in the more arid habitats.

Systems: Terrestrial

Use and Trade

This species is not used.

Threats

The species is tolerant of disturbance and there are no threats currently impacting it.

Conservation Actions

There are no specific conservation actions in place for the species.

Appendix

Habitats

(<http://www.iucnredlist.org/technical-documents/classification-schemes>)

Habitat	Season	Suitability	Major Importance?
1. Forest -> 1.4. Forest - Temperate	Resident	Suitable	Yes
14. Artificial/Terrestrial -> 14.3. Artificial/Terrestrial - Plantations	Resident	Suitable	Yes

Additional Data Fields

Distribution
Lower elevation limit (m): 0
Upper elevation limit (m): 600
Population
Population severely fragmented: No
Habitats and Ecology
Continuing decline in area, extent and/or quality of habitat: No
Generation Length (years): 1-2
